LET'S ELEVATE YOUR BRAND

In the world of branding, consistency is everything. Consistent look, consistent feel, consistent values. And of course, consistent high quality. Those who take branding as seriously as we do are only satisfied when their brand experience perfectly reflects their brand identity. Down to the very last fiber.

When it comes to branded apparel, this is where the bar should be set. Brands that are worn with pride are brands that last. Elevated in people's preference. This is what Elevate is all about. It's in our name, it's in our nature; it's in everything we do. From the design, to development, down to the actual delivery. We're right on top of it all. That's how we guarantee quality and consistency for every single piece of branded apparel we deliver. Suited for everyone, every single time.

AWARE™ – DARINGLY SIMPLE TRACEABILITY

How can we build trust in sustainability claims? By ensuring trusted traceability for every step of the supply chain with Aware™ technology.

Starting from the very origin of an item's fabric, this innovative solution brings unprecedented transparency to the supply chain. By embedding a physical tracer into sustainable raw materials. This tracer can be authenticated with the Aware™ hand scanner from every tier of the supply chain anywhere, anytime. The blockchain platform securely records production information, creating a digital replica of the material's journey, ensuring accurate data for recycling processes. Digital tokens, the Aware™ Crypto TCs™, validate every step, upholding the integrity of the supply chain information. The user-friendly Virtual ID acts as a digital product passport for consumers and simplifies making informed choices.

UNDYED

These products are made from 'Undyed' fabric. No dyes, water or chemicals are needed in this innovative process, which means it has less negative impact on our planet. Starting with textile waste from manufacturers and traders, the colour of the waste dictates the final hue. After manual sorting and quality checks, the waste is recycled into cotton fiber without chemicals. Blended with other recycled fibers, like polyester, viscose, acrylic, EcoVera™, or Tencel™, the resulting yarn is strong and high-quality. Through careful processing, the material is formed and spun into the final, more sustainable coloured yarn.
